

## Sorting Guide for Wood (A1 and A2)

### What is wood waste?

Wood waste is typically clean or mechanically processed, discarded wood, such as wood from packaging, kitchens, pallets, clean demolition wood, particleboard, and plywood panels.

The mixed wood passes through one of HCS's facilities for inspection and possible sorting before being sent for recycling.

If you would like to arrange a pickup, request a quote, or need more information, please feel free to contact HCS customer service via email at [info@hcs.dk](mailto:info@hcs.dk) or through the following phone numbers. We look forward to hearing from you:

- Zealand - Phone +45 43 42 41 00
- Funen - Phone +45 66 16 90 55
- Southern and Central Jutland - Phone +45 86 40 70 88
- Northern Jutland - Phone +45 98 82 08 11

### YES, PLEASE

- Wood from packaging
- Pallets
- Single-use pallets\*
- Kitchens
- Particleboard
- Plywood panels
- Clean demolition wood
- Machine boxes

Note! The wood must have a maximum moisture content of 30%, be free of mold, mildew, and rot. Small foreign objects such as nails, screws, aluminum, fittings, and non-magnetic metals are accepted.

\*The blocks on the pallet must not consist of particleboard or similar materials.

### NO, THANK YOU

- Impregnated and creosote-treated wood
- Pressure-treated wood
- Exterior doors
- Garden waste, e.g., tree roots/stumps
- MDF and masonite boards
- Fire-retardant boards
- Cellular doors
- Upholstered furniture
- Window wood
- Burnt/scorched wood
- Wood with paint, varnish, and glue
- Other waste
